

DTU Centre for Collaborative Autonomous Systems

Conference

November 24–25 2021

Technical University of Denmark

Frontiers in Autonomous Systems

*Odense Robotics is co-financed by Ministry of Higher Education
and Science and the Danish Board of Business Development*

Towards a sustainable and resilient world powered by the seamless collaboration of humans with autonomous systems

Welcome to FAS 2021!

The Open Forum to discuss the latest trends in Autonomous Systems

- 4 plenary talks by internationally leading scientists
- 8+ keynotes from researchers and industrial practitioners
- Multiple sessions on core topics

Unlimited networking possibilities
with industry peers and leading
scientists. Don't miss the opportunity to
kick start your next innovation project

Experience the State-of-the-Art in Autonomous Systems
through technological demos and having a ride on the
autonomous bus

Confirmed Plenary Speakers

Roland Siegwart
Professor of Autonomous Systems
ETH Zurich

“Mobile Robots – Design and Autonomous Navigation”

Marija Slavkovic
Professor of Artificial Intelligence
University of Bergen

“Human Ethics in Artificial Autonomy”

Thomas Bolander
Professor of Artificial Intelligence
Technical University of Denmark

“Human-Robot Collaboration through Epistemic Planning”
